

OPERATING SYSTEMS CONCEPT – LAB

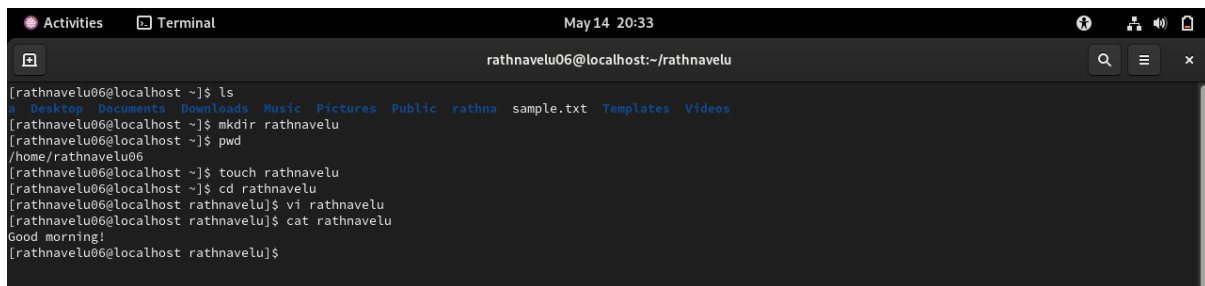

EXP – 01: BASIC LINUX COMMANDS

LS COMMANDS

A terminal window titled 'Terminal' with a timestamp of 'May 14 20:31'. The window shows the user 'rathnavelu06@localhost' in the directory '~/rathna'. The user enters the command 'ls', which lists files: 'bankeralg', 'bestfit', 'firstfit', 'ipc', 'pageReplacement', 'producerConsumer', 'scheduling', and 'systemCalls'. Then, the user enters 'ls -l', which shows a detailed listing of these files with permissions, owner, group, size, and date. Finally, the user enters 'ls -lt', which lists the files sorted by modification time, showing 'firstfit' as the most recent.

```
[rathnavelu06@localhost rathna]$ ls
bankeralg bestfit firstfit ipc pageReplacement producerConsumer scheduling systemCalls
[rathnavelu06@localhost rathna]$ ls -l
-rw-rw-r-- 1 rathnavelu06 17438591 firstfit 35416751 pageReplacement 52943235 scheduling
-rw-rw-r-- 1 rathnavelu06 52943268 ipc 17438589 producerConsumer 35416739 systemCalls
[rathnavelu06@localhost rathna]$ ls -lt
-rw-rw-r-- 1 rathnavelu06 52943268 ipc 35416739 systemCalls 17438589 producerConsumer 17438591 firstfit
-rw-rw-r-- 1 rathnavelu06 35416751 pageReplacement 52943235 scheduling 16777360 bankeralg 1608954 bestfit
[rathnavelu06@localhost rathna]$ ls -lrt
-rw-rw-r-- 1 rathnavelu06 1608954 bestfit 16777360 bankeralg 52943235 scheduling 35416751 pageReplacement
-rw-rw-r-- 1 rathnavelu06 17438591 firstfit 17438589 producerConsumer 35416739 systemCalls 52943268 ipc
[rathnavelu06@localhost rathna]$
```

VI, PWD, TOUCH, CAT COMMANDS

A terminal window titled 'Terminal' with a timestamp of 'May 14 20:33'. The user 'rathnavelu06@localhost' is in the directory '~/rathnavelu'. The user enters 'ls' to list files: 'Desktop', 'Documents', 'Downloads', 'Music', 'Pictures', 'Public', 'rathna', 'sample.txt', 'Templates', and 'Videos'. Then, the user enters 'mkdir rathnavelu' to create a new directory. Next, the user enters 'pwd', which shows the current directory as '/home/rathnavelu06'. Then, the user enters 'touch rathnavelu' to create a new file. After that, the user enters 'cd rathnavelu' to change the directory. Then, the user enters 'vi rathnavelu' to open the file in the vi editor. Finally, the user enters 'cat rathnavelu', which displays the content of the file: 'Good morning!'.

```
[rathnavelu06@localhost ~]$ ls
Desktop Documents Downloads Music Pictures Public rathna sample.txt Templates Videos
[rathnavelu06@localhost ~]$ mkdir rathnavelu
[rathnavelu06@localhost ~]$ pwd
/home/rathnavelu06
[rathnavelu06@localhost ~]$ touch rathnavelu
[rathnavelu06@localhost ~]$ cd rathnavelu
[rathnavelu06@localhost rathnavelu]$ vi rathnavelu
[rathnavelu06@localhost rathnavelu]$ cat rathnavelu
Good morning!
[rathnavelu06@localhost rathnavelu]$
```
